# About CHDs and CHF

## Congenital Heart Defects and The Children's Heart Foundation

Congenital heart defects (CHDs) are problems with the heart's structure or function, present at birth. CHDs are the most common birth defect in the U.S., affecting nearly 1 in every 110 births (or a child born every 15 minutes) and are the leading cause of birth defect-related deaths. There are no cures for CHDs.

**The Children's Heart Foundation is the leading organization solely dedicated to CHD research funding.** Our mission is to advance the diagnosis, treatment, and prevention of CHDs by funding the most promising research. Since 1996, the Foundation has funded nearly \$20 million of CHD research and scientific collaborations.

*Our research funding spans:*

Independently-funded research grants

Joint funding with the American Heart Association

Multi-network data sharing and benchmarking with Cardiac Networks United

CHD research fellowship with American Academy of Pediatrics

Funded research has helped to dramatically increase survival, longevity and quality of life for patients who face a CHD diagnosis. Critical breakthroughs from funded research have included improved diagnostics and imaging, groundbreaking procedures and in utero interventions, device development, laboratory launch, life-saving treatments, and more. Research funding has helped reduce death rates 37.5% since 1999, and with increased survival, an estimated 2 to 3 million Americans are now living with CHDs.

# About Congenital Heart Walks

## Transform Lives Through the Congenital Heart Walk Series

The Congenital Heart Walks are the premier fundraising walk series dedicated exclusively to congenital heart defect research. With 34 walks held annually around the country, our growing platform unites thousands of supporters across the country with one powerful mission: advancing breakthrough treatments for Heart Warriors.

Our vibrant, community-driven events are orchestrated by dedicated volunteers and bring together families, medical professionals, and corporate partners in a celebration of hope and progress. Every dollar raised directly funds vital CHD research, honoring both the heart warriors fighting this battle and the angels who left us too soon.

### Partner Benefits:

- Multi-platform visibility before, during, and after events
- Sponsorship acknowledgement in emails, social media, walk website, inclusion on t-shirts and signage, and more!
- Meaningful engagement with the CHD community
- Ability to customize sponsorship levels for unique activations
- Team-building opportunities for your employees
- Direct impact on life-changing research

Join our community of corporate and community champions. Your partnership will help drive the next generation of medical breakthroughs, extending and improving the lives of Heart Warriors nationwide.

### About the Event:

The Congenital Heart Walk is a meaningful gathering to support families affected by congenital heart defects. Join us for a day filled with hope, unity, and a shared commitment to making a difference.

### Event Highlights:

- Walk for a Cause:** Take part in a walk to raise awareness and funds for congenital heart research.
- Family-Friendly Activities:** Enjoy games, music, and activities for all ages (examples include face painting, balloon artists, photo booth, crafts, characters, and more!)
- Heart Hero Recognition:** Celebrate heart warriors, remember heart angels, and support individuals and families who inspire us with their resilience
